PROFESSIONAL SUMMARY

Results-driven engineer with 5+ years of cross-disciplinary experience spanning Electrical Engineering, Full-Stack Software Development, and AI Automation Engineering. Adept at designing and maintaining electrical systems, building scalable software applications in Java, Python, and JavaScript, and architecting intelligent automation workflows using n8n, LangChain, and CrewAI. Holds a Microsoft Azure AI Engineer certification and brings a rare combination of hands-on hardware expertise with cutting-edge software innovation to every project.

CORE SKILLS

Electrical Engineering

- Power Systems Design & Maintenance
- Electrical Installation & Commissioning
- Lift/Elevator Systems Maintenance
- Fault Diagnosis & Safety Compliance

AI & Automation

- n8n, LangChain, CrewAI
- Anthropic API & OpenAI API Integration
- Google Cloud Workflows
- AI Workflow Design & Prompt Engineering

Software Development

- Java, Python, JavaScript
- Object-Oriented Programming (OOP)
- RESTful API Design & Integration
- Full-Stack Application Development

Cybersecurity

- System & Network Security
- Security Assessment & Hardening
- Vulnerability Analysis
- Security Policy Implementation

WORK EXPERIENCE

Software & Cybersecurity Engineer | Ethnos Cyber Ltd | 2022 – Present

- Designed and developed full-stack software applications using Java, Python, and JavaScript
- Built and deployed AI automation workflows using n8n, LangChain, and CrewAI frameworks
- Integrated Anthropic Claude and OpenAI GPT APIs into production-grade intelligent automation systems
- Developed RESTful APIs and webhook-triggered automation pipelines for business process optimization
- Conducted system security assessments and implemented cybersecurity protocols to protect client infrastructure

Electrical Maintenance Engineer | Eurolift | 2019 – 2022

- Maintained, serviced, and repaired elevator and lift electrical systems, control panels, and circuits
- Diagnosed and resolved complex electrical faults, reducing equipment downtime across multiple client sites
- Ensured strict compliance with national electrical safety standards and relevant industry regulations
- Coordinated with project management teams on installation and commissioning of new lift systems
- Prepared detailed maintenance reports and documented fault history to support continuous improvement

Electrical Engineer | Watthour Electrical Engineers & Consultants | 2015 – 2019

- Designed electrical systems for commercial and residential construction projects from concept to handover
- Conducted site inspections, load analysis, and electrical calculations for planning and compliance
- Prepared technical drawings, schematics, and Bill of Materials (BOM) documents for client approval
- Supervised electrical installation, testing, and commissioning activities on active construction sites
- Collaborated with clients and contractors to deliver projects on time, within scope and agreed budgets

KEY PROJECTS

AI Restaurant Automation System — *n8n · GPT-4o-mini · Google Sheets · Webhooks*

- Built a 9-node automated order management workflow with intent routing, AI-generated responses, and real-time logging
- Implemented webhook triggers, IF-branch logic, and Google Sheets integration to simulate a full restaurant backend

Developer Portfolio Website — *officialvalz.github.io*

- Designed and deployed a live personal portfolio showcasing software, AI automation, and engineering projects

BankApp System — *Java · JUnit 5 · BDD Testing · OOP*

- Built a full banking application with custom exception handling, account management, and BDD-style JUnit 5 test suite

EDUCATION

B.Sc. Electrical Electronics Engineering

Delta State University, Abraka | *Graduated: 2015*

CERTIFICATIONS

Microsoft Certified: Azure AI Engineer Associate | *Microsoft*

Prompt Engineering Specialist
